

# MODBURY

SUN-HOOD | SUNSHADE | FACADE SCREEN

## PRODUCT DESCRIPTION

The ADA Modbury Series is our compact, panelised aluminium sun-louvre—ideal where a slim build is critical. At 60 mm total width (vs 86 mm for Crew), Modbury keeps sightlines clean while delivering dependable shade. Blades are mounted on a central tie-rod with aluminium spacers at 40 mm centres and set to an effective ~45° shading angle. All-aluminium construction with stainless fixings ensures low maintenance and long service life, finished in powder coat or anodising for horizontal or vertical use.

## MATERIAL

STANDARD - Australian extruded aluminium 6063-T5  
OPTIONAL - High quality Australian steel, vermin/bird mesh

## FINISH

STANDARD - Mill Finish or Natural anodised  
OPTIONAL - Colour anodised or powder coated

## INSTALLATION

Factory-assembled Modbury panels fix to a straight, plumb sub-frame using stainless fasteners; shim behind stiles to align faces and keep blade pitch consistent. For horizontal hoods, set level with required fall; for vertical screens, maintain uniform panel gaps and flush faces to tolerance. Sun-louvres provide shade/screening—not full weatherproofing—so include flashings/back-pans where rain exclusion is required.

## DESIGN & DIMENSIONS

OPTIONAL - Blade Vertical or Horizontal
